

Matheus Secco Lazzuri

Kissimmee, FL | +1 (970) 914-2475 | matheussecco2@gmail.com | linkedin.com/in/matheuslazzuri

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience designing and shipping production systems across web and mobile. Eager to grow as part of a collaborative engineering team.

TECHNICAL SKILLS

Languages: Python, JavaScript, C++, Dart, TypeScript

Frontend: React, Flutter, React Native, HTML, CSS

Backend & Databases: Python, SQL, Firebase, Supabase, BigQuery

Tools & Platforms: Git, VSCode, RESTful APIs, Browser Extensions, Agile

PROFESSIONAL EXPERIENCE

Software Engineering Intern | ConsenTerra Inc.

April 2026 – Present

- Lead development of privacy compliance features for B2B SaaS platform serving legal and compliance professionals
- Architected and shipped PriXplainer Browser Extension using React and TypeScript; integrated proprietary PrivBERT AI model and implemented RESTful API integration for real-time policy analysis
- Built conversational AI assistant using Claude API and Deepgram voice integration for privacy questionnaire completion
- Collaborated with product and design teams using Agile development practices to deliver features in bi-weekly sprints
- Tech stack: React, TypeScript, Supabase, Claude API

Full-Stack Developer Intern | Quantum13 (Networking Company, Brazil)

May 2025 – January 2026 | Contract

- Designed and implemented cross-platform internal operations system using Flutter for mobile and web interfaces; replaced manual Excel-based workflows
- Built Python and BigQuery data pipeline to consume third-party APIs and aggregate client data for internal dashboards
- Tech stack: Flutter, Firebase, Python, BigQuery

EDUCATION

Bachelor of Science in Computer Science

Colorado Mesa University, Grand Junction, CO | Cum Laude, 3.6 GPA

Student-Athlete, Soccer: Served as team captain during college

ADDITIONAL PROJECTS

ServicePro | Field Service Management Mobile App

- Developing mobile-first SaaS platform for tradespeople (plumbers, electricians, etc.) to manage field service operations; built comprehensive business plan and product strategy
- Tech stack: React Native, Supabase
