Portuguese (Native)
English (Fluent)
Spanish (Fluent)

EXPERIENCE

Full-Stack Developer | Quantum13

Remote (São Paulo, Brazil)

May 2025 - Present

- Contributed to the development of an integrated management system to modernize internal operations
- Helped replace Excel-based workflows and automate internal company processes
- Worked with Dart/Flutter and Firebase on a feature-driven project

Intercollegiate Athletics Admin | Colorado Mesa University

Grand Junction, CO

2023 - 2025

- Provided front-desk support, such as answering phone calls, working on spreadsheets

- Assisted management with a variety of tasks and daily operations
- Adapted to ad-hoc requests and completed tasks efficiently, demonstrating flexibility and a "do-it-all" attitude.

Checkout & Reserve Attendant | Colorado Mesa University (Tomlinson Library)

Grand Junction, CO

2023 - 2025

- Managed check-in and check-out of library items
- Assisted patrons with room reservations, questions and support

PROJECTS

Integrated Management System (Q13)

- Web platform to replace Excel-based workflow and automate internal company processes
- Implemented a role-based access control (RBAC) system with differentiated privileges across multiple account types
- Developed with Dart/Flutter in the front-end, and Firebase (Cloud Functions, Authentication, Firestore) on Google Cloud Platform for the backend
- Allows company to manage service, workflows and provides real-time dashboards for the clients

Seccotruco.com

- Website made to teach my friends how to play *Truco* - a Brazilian card game
- Made with React, JavaScript, HTML and CSS

MavAquatics Platform

- Web platform for the MavAquatics swim club.
- Provides a centralized, full-stack platform for coaches, swimmers and parents
- Made with Dart/Flutter with Firebase as the backend
- Provides user authentication and role-based access
- Semester long project for my Software Engineer class

Password Manager (Python and Tkinter)

- GUI password wallet application, made for my Operating Systems class final project
- Made with Python, uses encryption to store passwords, and has user-authentication
